SOUND FAMILIAR?

Running a college should not mean chasing paper.

- ✕ **Attendance totalled at month end**
  ✓ Marked each period, seen by all straight away
- ✕ **Paper deadlines chased by phone**
  ✓ Every paper has a deadline and a live status
- ✕ **Fee dues in separate spreadsheets**
  ✓ One live ledger for every demand and receipt
- ✕ **Accreditation data collected in a rush**
  ✓ NAAC, NBA and NIRF figures from daily work
- ✕ **Approvals waiting on someone's desk**
  ✓ Set chains, time limits and escalation
- ✕ **Problems reported after they happen**
  ✓ Live metrics and alerts for every campus

Each office works in one system. The rest builds itself.

SEE IT FOR YOURSELF

Book a demo.

We will walk you through UniqERP, role by role, and show how it would fit the way your college works.

- ✓ Your questions, answered on the live system
- ✓ A tour for each role, from management to parents
- ✓ How your existing data moves in

Screens show sample data.

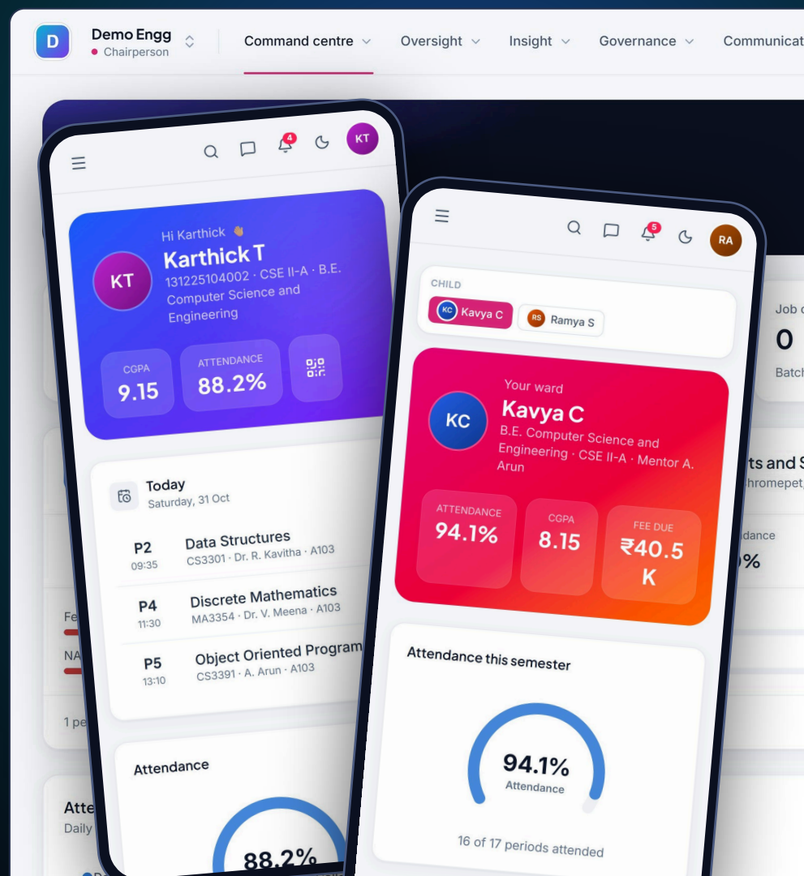

The ASK Company

UniqERP

Every campus. One platform.

The complete management system for colleges, from the first admission enquiry to the final published result.

Admissions · Academics · Examinations · Fees · HR · Accreditation · Mobile app

THE JOURNEY

One student.

Enquiry
Every call logged

Application
Filled in online

Admission
Record created

THE SYSTEM

One record.

Timetable
Clashes refused

Attendance
Marked by period

Internal marks
Approved and frozen

THE RESULT

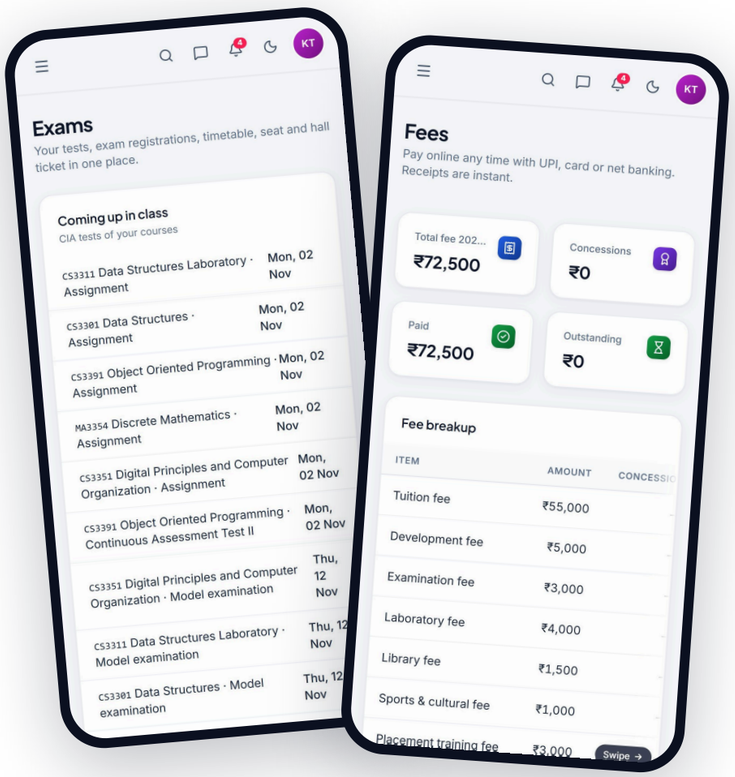

Every office.

Hall ticket
Eligibility checked

Results
GPA and CGPA updated

Placement
Drives and offers

From first enquiry to final result, one record follows them.

No office types the same details twice.

Each person sees their own work, and it moves without being chased.

Timetables built automatically
Teacher, room and class clashes refused

Ready for every visit
NAAC, NBA and NIRF from daily work

Students at risk, spotted early
Early warnings, with the reasons shown

Approvals that move
Overdue requests escalate themselves

Documents anyone can check
Issued with a reference and a QR code

Every feature is explained in the **UniqERP features booklet.**

21 role-based portals

21 automatic jobs

14 QR-verifiable document types

250+ rules you set
